A. In groups of three, discuss the following questions and base your answers on solid grounds (i.e., laws, readings, etc.).

1. What is the right of intellectual property?
2. What does the phrase “copyright” mean?
3. Why do you think people want to protect this right?
4. What does creativity has to do with this right? Why do people enforce it?
5. Do you think the lack of original works in Costa Rica is due to a proper copyright law?
6. If you become an inventor or a producer of knowledge, would you like your knowledge to be protected? Why yes or why not?
7. Do you think that having pirated copies of someone else’s work is right or wrong? Why?
8. What solutions do you think could be given to this problem?
9. What types of technologies are the most vulnerable to copyright infringement? Give examples from your own usage of this technology.
