Part I: Formal Presentation (60 minutes)

“Is computer assisted language learning superior to traditional in-class language learning?: Input Processing Theory and Processing Instruction”

By: Jorge Aguilar-Sánchez – Indiana University, Bloomington-IN
James F. Lee – New South Wales University, Sydney-Australia
Erin McNulty – Indiana University, Bloomington-IN

Presenter: Jorge Aguilar-Sánchez

Part II: Research Questions Workshop (90 minutes)

Continue working on the preparation of the materials and tests. Remember that you need to base them on solid theory. In other words, you need to look for the scientific justification for the use of X instrument and/or test. The review of the previous literature will give you hints on how to construct the instruments to be able to answer your research questions.
