Management Information Systems (MIS)

www.UDMIS.info
Management Information Systems (MIS)

- Operates at the intersection of business & information technology
- Helps organizations solve business problems & pursue business opportunities using information technology
- Focuses on the informational component of business products, services or processes
MIS is **central** to business

Business functions need information. MIS professionals deliver it.
MIS bridges **business** & **technology**

Business processes need information technology. MIS professionals deliver it.
# MIS is about technology for business
